

What makes an ideal herbicide for wheat this autumn ?

Summary
Use Digital this autumn to boost your grass-weed control !

- Does it will fit well into your weed control programmes this autumn ?	Digital does.
- Is it an easy-to-use low application rate liquid formulation which makes it an ideal product for the spray operator ?	Digital is.
- Are there any restrictions on varieties, sequences, or following-crops ?	Not with Digital.
- Are there concerns about resistance ?	Not with Digital.
- Can it be used either pre-emergence or post-emergence ?	Digital can.

- Digital contains flumioxazin in an easy flowable 300g/L formulation.
- It offers excellent control of annual meadow grass as well as having an enviable broad-leaf weed spectrum.
- Rate of use :- 100ml/ha

Annual Meadow Grass

Spray post-emergence before the annual meadow grass exceeds 2 leaf stage. Flumioxazin offers excellent control of annual meadow-grass, which coupled with its broad-leaf weed activity means it's the ideal autumn product alone for medium AMG areas. The addition of 0.1L/ha Liberator or a low dose CTU will maximise its activity if there is a high AMG population.

Can it be mixed with a pyrethroid for BYDV control ? Yes.

Can it be mixed with pendimethalin products ? NO. See note below.

Broad-leaf weed control

Digital has an enviable broad-leaf weed spectrum, either pre- or post-emergence. This makes flumioxazin an ideal product for autumn programmes. As well as the extensive list of weeds on the label, flumioxazin is reported to be excellent post-em on volunteer beans, borage and a range of other less common autumn germinating species.

Does it control poppies, charlock, groundsel, mayweed, cleavers, speedwells ?

Yes. Read the label and the Autumn 2010 leaflet for a full spectrum, or ring Interfarm.

What are the DO's and DO NOT's ?

Do start and finish spraying with a clean tank. You might be surprised about the amount of residue left in a spray tank from a previous task even after flushing with water

Do not mix with pendimethalin products, either pre or post-emergence for reason of crop safety.

Do not mix with adjuvants or highly wetted products for the same reason

Download the FMX leaflet from the Interfarm website. www.interfarm.co.uk
