

Squire Ultra

Squire Ultra is a new product from Interfarm for control of docks and some annual broad leaved weeds in grassland. It contains 75% amidosulfuron in a water dispersible granule formulation.

Summary

Squire Ultra, now available from Interfarm, replaces Squire for dock and broad-leaved weed control in grassland.

- Squire Ultra (75%) will replace Squire (50WDG).
- This means a 1/3rd reduction in product rate to deliver the same active ingredient per hectare.
- Pack size is 240g which is enough to treat 4ha at full rate.
- Clover safe
- All other recommendations remain the same

Old Squire rate g/ha	Squire Ultra rate g/ha
90	60
75	50
60	40
45	30
30	20

Product and Label Summary Information

Active ingredients:	Amidosulfuron 75 WDG (75% w/w)
Crops:	Permanent grassland (including rotational grassland)
Rate of use:	60g/ha
Max individual dose:	60 g/ha
Max total dose:	60 g/ha per year
Max No treatments/year	No restriction (but note maximum total dose above)
Time of application (Rotational grass):	Only between 1st February and 30th June
Time of application (Permanent grass):	Only between 1st February and 15th October
Size of docks at application:	Large dinner plate size rosette and actively growing
Other specific restrictions (1):	Livestock must be kept out of treated areas for at least 7 days weeks following treatment and until poisonous weeds such as ragwort have died and become unpalatable
Other specific restrictions (2):	Hay or silage must not be cut from treated crops for at least 21 days after treatment.

Mode of Action

Squire Ultra is a sulfonylurea herbicide that does not harm white clover yet controls both broad and curled docks in rotational and permanent grassland. It is slower acting than other types but is fully systemic which means it moves throughout the weed and into the roots which is especially important for control of a perennial weed such as dock.

Weeds Controlled

All species of dock from seedling to full rosette stage, cleavers up to flower bud, charlock up to flower bud, shepherds purse up to flower bud, field forget-me-not up to 6 leaves.

Clover

Squire Ultra may be used on grassland with white clover. Avoid using on swards containing red clover. On newly established grassland, apply from grass 3 leaf stage and 1- trifoliolate leaves of the clover.

Please note

Initial supplies of Squire Ultra will be in Bayer livery Squire Ultra (MAPP 13125) however later supplies will change to Interfarm labelled product (MAPP 14401) but there will be no label text changes.
